SUMMARY

I am a client-oriented software developer who excels in collaborative team environments and is known for providing impactful solutions. My strengths include critical thinking, identifying project vulnerabilities, and continuous improvement. I'm dedicated to acquiring new skills by pursuing relevant qualifications to advance my career and contribute to organisational success.

PROJECTS

GC Activity Rentals - Booking application - [Github](#) | [Site](#)

Stack: MERN-Stack, Bulma CSS | Aug 2024

- Built the fully responsive frontend for GC Activity Rentals, an online booking platform for an activity rental stand on the Gold Coast. Using the MERN stack and Bulma CSS, the app makes it easy for users to browse and book equipment.

The Emporium - Collectibles Marketplace [Github](#)

Stack: MERN-Stack, Tailwind CSS | Sep 2023

- Developed the frontend of *The Emporium*, a platform for buying and selling rare collectibles. Designed and built key pages, including the **sign-up/login page, main home page, and upload page**. Integrated Cloudinary to manage image uploads.

Dino Park - Productivity Timer App - [Github](#) | [Site](#)

Stack: Django, PostgreSQL, HTML, Tailwind, JavaScript, | Oct 2023

- Designed and implemented Dino Park, a web application that gamifies the popular Pomodoro technique to boost productivity. Users have the opportunity to build their virtual "Dino Park" by hatching dinosaur eggs during focused work sessions.

KEY SKILLS:

- Strong Communication Skills
- Teamwork and Collaboration
- Problem-Solving
- Critical Thinking
- Attention to Detail
- Coding & Troubleshooting
- Web App Development
- Backend Development
- Interface Designing
- Agile Methodology
